

Shane Poppas

22 Glenridge Drive
Portland, Maine 04102
Phone: (207) 450-4869
Email: shane.poppas@maine.edu or shane.poppas@gmail.com

Education:

University of Southern Maine, Gorham, Maine
Bachelor of Science, *cum laude*, Environmental Science, December 2013

Relevant Experience:

- Assistant Hydro Manager / Chief Dam Safety Engineer CO-OP at Sappi Fine Paper in Westbrook, Maine
- Lab Technician / Research Assistant at Hydro International in South Portland, Maine
- Research assistant for the Aquatic Systems Research Group at the University of Southern Maine
- Conducted water quality monitoring of the Long Creek watershed in Southern Maine using analytical techniques (i.e. pH, turbidity, temperature, etc.) to determine the physical/biological condition of the watershed based on MDEP guidelines/requirements
- Study of Highland Lake, Maine using analytical instruments and data collection/analysis via biological indicators and physical conditions developed by MDEP
- Investigation of heavy metals in aquatic systems in Maine using x-ray fluorescence spectrometry to determine possible bioaccumulation of contaminants in blue mussels (*Mytilus edulis*)
- Graduate Study Research Assistant: Measured trace elements in Maine Rivers using inductively coupled plasma mass spectrometry to aid in the examination of migration patterns of blueback herring (*Alosa aestivalis*)
- Presumpscot River, Maine study using MDEP regulatory guidelines for water quality classification and biological indicators to determine the impact of heavy metals in parafluvial systems along the watershed
- Proficient computer skills: Experience with Microsoft Office Suite, Adobe Acrobat, Google Tools, SharePoint
- Ability to write reports and organize information/data in a proficient manner
- Strong professional working experience (interpersonal skills, group management, communication skills)
- Basic knowledge/interpretation of environmental and safety regulations
- Capable communication with federal, state, and local regulatory agencies (i.e. FERC, MDEP, EPA, IFW)
- Experience/Proficiency in writing regulatory documents and plans
- Phase 1 Site Assessment of the Saccarappa dam fish ladder involving FERC licensing requirements
- Analytical skills and experience using a multitude of lab instruments executed by means of required SOP's

Independent Projects:

- Presumpscot River Saccarappa Dam: Phase I Site Assessment for an Environmental Impact Assessment (2012)
- Spatial distribution and variability of heavy metals in parafluvial systems along the Presumpscot River (2011)
- Biomonitoring of heavy metals in the Kennebec River System using blue mussels, *Mytilus edulis*. (2012)

Presentations:

- Presumpscot River Saccarappa Dam: Phase I Site Assessment for an Environmental Impact Assessment (2012)
- Maine Water Conference 2012: Lake, Stream, and Wetland Water Quality Session
- University of Southern Maine Thinking Matters (2012 and 2013)
- University of Southern Maine Civic Matters (2012)
- Spatial distribution and variability of heavy metals in parafluvial systems along the Presumpscot River (2011)

Professional Chronology:

Research Assistant / Lab Technician
May 2014 – June 2014
Hydro International
South Portland, Maine

Chief Dam Safety Engineer / Hydro-Management Office CO/OP
April 2013 – December 2013
Sappi Fine Paper North America
S.D. Warren Mill Westbrook, Maine

Research Lab Assistant
March 2012 – April 2013
Aquatic Systems Research Group
University of Southern Maine

Sub-Contract Painter (Foreman)
June 2006 - Current
Anthony D'Agostino Custom House Painting and Restoration – Portland, Maine

Mills Division Spray Finish Foreman
February 2003 - May 2006
Wright-Ryan Construction – Portland, Maine

Painter (Foreman)
April 1999 - January 2003
Pitre Painting LLC – Falmouth, Maine
