- Manufacturing

ACCOMPLISHMENTS

Successfully planned and started a blending and manufacturing plant at Polymer Research Corporation.

Help found and nurture Polymer Research Corporation even after its sell to GEO Chemical in 2012.

EXPERIENCE

1979-1981 - Was essential to building Pearl River Chemical. Oversaw manufacturing of polymers and production of blends of all kinds. Also, worked in shipping and receiving.

1981-1983 - Moved into sales and technical services. Later, became the sales representative dealing with major accounts such as Exxon Chemical, Baton Rouge, La., Crown Zellerbach Pulp and Paper, St. Francisville, La., Texaco Shell Oil, and other major nation wide waste and water plants.

1983-1987 - Worked in sales and technical services for Chemlink after Pearl River was sold to ARCO Corporation. Was given the Southeastern region to serve as service representative.

1987-1993 - Helped form a polymer plant with Trident Chemical manufacturing polymers and resins. Held the position in sales and services.

1993-2012 - Help found Polymer Research Corporation. Became plant manager and built the blending and manufacturing facility. At this facility, produced waste and water treatment chemicals, boiler and cooling tower blends, polymers (ex. polymine, melamine, resins, dadmack), and mannich blends.

2008-2012 - Managed production of emulsion polymers at Polymer Research Corporation. Produced over thirty different oil based and water based polymers.

EDUCATION

General Studies

Southeastern University – Hammond, Louisiana
