Experience:

As a Senior Property Specialist with KBR I have eleven (11) years experience in the areas of performing property inventories ensuring property accountability, audits, Investigating Lost, Damage & Destroyed (LDD) reports on government assets to determine the extent of damages / liability, this will include the contractor acquired property/Government Furnished Equipment/ and leased assets and supervising 6-18 personal. I conduct inventories / manage the technical inspections consolidating the transfer's package for the approval process; I am responsible to conduct self audits in various areas of the property functions and document findings. I coordinate with the Plant

Clearance Officer and the Government Property Administrator in the disposition of scrap to DRMO. I am responsible to –initiate / update the official property books reflecting any changes or new property being added / removed.

I communicate with others effectively both orally and in writing working out solutions to problems or questions relating to work issues and/or requested information requested by the Government Property Administrator. I used the risk management approach to direct and coordinate the work assignments of each team member. I planned / set my own work priorities and carried out assignments effectively by understanding Management's goals as they affect the day to day operations. I provided technical direction as a troubleshooter to problem resolution, by analyzing changes in the team activity with willingness in considering new ideals or divergent points of view. I am often called upon by my peers on other sites throughout Iraq to provide assistance and/or guidance. I am called to conduct training to various departments to ensure that they have a good understanding of property management and property accountability.

I have processed equipment for the RESET program and have received equipment from the Reset program.

I communicate effectively both orally and in writing with the client working out solutions to problems, procedures or questions relating to lateral transfers to or from the military in regard to equipment, vehicles and various other items on a day to day basis.

I have 1 year experience of running the tool room within the warehouse maintaining stock levels, verifying inventories and issuing and receiving tools on a daily basis.

I was the Senior Warehouse Foreman for nine (9) months to include being the night shift Supervisor for the Class I GS yard. As the Warehouse Forman I was the senior to ensure that property and materials were being received in a manner that allowed for a thorough inspection / physical count validating the contractual requirements / Purchase Order requirements have been met. I was responsible to post the received items of property / materials into the accountability database. I managed the level of stock in accordance with the procedural requirements and notified the applicable departments when stock level was low to ensure that the requisitions were initiated as necessary.

As the Supervisor of the Class I yard (Re-Distribution Center) I managed / controlled the supplies to the stock level that was required by contract, reordering when stock was running low. Inbound and outbound shipments average was between 150 to 200 trucks a night. I supervised 30 employees when packing supplies on the pallets and in containers, making sure they were properly shrink-wrapped and marked appropriately. My main functions were to train, organize and verify that my employees operated to their approved written procedures.

I was transferred to the Corporate office as a Senior Materials specialist where I still managed the property books, did catalog request, DODAC request, research request, Document control and archiving of files.

Proficient with STEAM/MAXIMO/SAP and Microsoft Office

On a daily basis I use MAXIMO/SAP to research information, make changes to or update the property book. Pull and print reports from MAXIMO to include the property book. Use Microsoft word for request, property supporting documents and memos, Excel spread sheets, Power Point and Access on daily basis for tracking, research info, presentations and anything else that may be needed.

I use to do the new comers briefing with the new KBR employees to provide a block of instruction on property accountability, LDDs and what their responsibilities were. I have provided detailed training to departments when requested for the same responsibilities dealing with property.

21 years in the Army as a mechanic for 6 years and supply sergeant for 15 years involved in the following,

92Y24G3

15 years in ordering, purchasing (to include local purchases), receiving, stocking, storing, audits, inventorying, issuing and shipping supplies for the Army from unit level to brigade level
