GEOLOGIST - ENVIRONMENTAL SCIENTIST

Service-oriented geologist with extensive North American field and technical experience: sample collection, data management, analysis and interpretation. Oil and gas pipelines and transmission lines: Phase I, II & III Environmental Site Assessments / Environmental Impact Statements specific to paleontological resources, recovery and impact mitigation for Federal and local regulatory agencies and private companies (Western US). Exceptional customer care delivery, interpersonal and project management skills.

- Clear expectation to maintain current knowledge of state and federal environmental regulations: MEPA, MRTKA, CERCLA, RCRA, NEPA, SDWA, etc.
 - Follows field and laboratory sampling protocols ensuring validity of data analysis and maintaining regulatory compliance. Tasks completed with accuracy and efficiency.
 - Science Division Lead for asbestos abatement of research specimens and materials (NYC): EPA 40 CFR 763 – AHERA Project Designer (24 hr.) certification, expired.
 - Familiar with Northeastern US geology. Comprehensive training in geology, biology, stratigraphy-biostratigraphy, paleontology, and North American archaeology.
 - Author/co-author/editor: technical reports, peer-reviewed research papers, and professional society abstracts.
-
-

CERTIFICATIONS and TRAINING

- 40-Hour HAZWOPER, Certificate Number: 75 488 88 07; issued: 19 September 2014
 - Adult First Aid/CPR/AED (Red Cross), Certificate ID: GQUM0Y; issued: 23 Sept. 2014
 - ArcGIS: Tools and Functionality, ArcGIS 9.3.1., ESRI authorized GIS training (July 2009). Columbia University, Lamont-Doherty Earth Observatory, Palisades, New York.
-
-

COMPETENCIES

2D Mapping: Surface Geology-Soil Horizons-Sedimentary Stratigraphy | Field Evaluations: Sample Collecting – Laboratory Processing | Data Management | Critical Thinking – Problem Solving | Quality Assurance-Quality Improvement Techniques following ASQ Standards

EDUCATION

M.S., Geology - Idaho State University, Pocatello.

B.A., Major: Anthropology and Geography. Minor: Geology
- University of Southern Maine, Portland.

Master's Thesis—"Mad Chipmunk Cave Faunule: A late Pleistocene to Holocene Record for the North-central Great Basin". http://geology.isu.edu/thesis/Diveley_Denny_1999_ISU.pdf

RELEVANT EXPERIENCE

The Bridge, New York, NY

Quality Improvement Coordinator, May 2005–November 2014

Ensured regulatory compliance: monitoring and tracking administrative and clinical

documentation; results - two successful re-certification audits (State mandated). Led the implementation and management of all quality assurance and improvement projects for the Special Populations Programs (substance abuse and mental health); team writer of Policy and Procedures for Substance Abuse Programs; represent the Special Populations Programs at City committee meetings and trainings, coordinating with diverse coalitions and stakeholder groups.

Vanasse Hangen Brustlin, Inc., Watertown, MA

Environmental Scientist, October 2009 – September 2011

Project specific position (paleontology), Airport Group, Southern Nevada Supplemental Airport EIS Project; responsibilities included conducting and evaluating background literature surveys, synthesizing fossil locality records from research institutions, preparing the BLM permit for paleontological survey, arranging for appropriate repository agreements and curation agreements (Phase I). Under permit, was scheduled to conduct field survey where indicated by background research (Phase II).

American Museum of Natural History, New York, NY

Collections Administrator, Fossil Mammal Collections, Div, of Paleontology, 2001- 2003
Science Division Lead for Paleontology regarding all aspects of collection moves relating to asbestos abatement in the Frick Wing (ca. 30,000 sq feet of fossil mammal storage); developed and instructed fossil specimen care and handling training course for a hazardous waste removal contract company whose staff were not primary English speakers (mostly Spanish-speakers); day to day management and supervision of fossil mammal technical staff (3 employees); specimen re-housing, cataloguing and inventory project by staff; initiated the development of specimen condition report forms and the conservation of two desiccated *Cervalces* sp. (Pleistocene age) carcasses, conducted humidity sorption experiments to determine appropriate storage conditions.

American Museum of Natural History, New York, NY

Supervisor, Fossil Explainers Program, 1999 - 2001

Directed, and managed, training of 100+ volunteers who represent the AMNH to the visiting public (approximately 5 million visitors annually). Created and instructed a 13-week comprehensive training program in earth science and vertebrate paleontology for volunteers, implemented and coordinated training for and evaluation of 100+ Fossil Explorer volunteers; and 35 Sunday Information Desk Staff; trained Education Department staff and volunteers in general paleontologic principles and methods for special exhibits and gallery interpretation.

Dames & Moore, Erathem-Vanir Geological Consultants Inc., Natural History Resources - Environmental Consulting Firms: Santa Barbara and Los Angeles, CA; Pocatello, ID

Paleontological Consultant, 1991- 1999

Conducted Environmental Assessments and fieldwork: oil and gas pipelines, transmission and fiber optic lines throughout California, Colorado, Idaho, Montana, Nevada, Utah, Wyoming; geological fieldwork, assessed needs for paleontological mitigation, prepared Environmental Impact Reports specific to vertebrate fossil resources.

Natural History Museum of Los Angeles County, Los Angeles, CA

Curatorial Assistant, Sections of Invertebrate and Vertebrate Paleontology,

1990 – 1994. Conducted Environmental Assessments and prepared Environmental Impact Reports specific to fossil resources, assessed needs for paleontological mitigation. Paleontological fieldwork: survey/mapping localities and specimen recovery; training heavy equipment operators on legal compliance for protecting vertebrate fossil resources. Curation of fossil specimens (documentation, identification and cataloguing).
