

Kelle Smith
112 Dickey Valley Road, Harriman, Tn. 37748
(865) 405-8719

Experience Summary

Experienced environmental project lead/field manager having more than fifteen years experience of practical natural resource conservation, and environmental policy. As a team lead, continually meets project deliverables safely and efficiently with diverse teams in both environmentally challenging conditions and in office settings. Efforts include serving as lead on, monitoring well installation, well gauging, in situ bioremediation system installations, and remediation construction monitoring. Extensive experience in field measurement and characterization of sediment, groundwater, surface water, and biota. Provides technical support and legally defensible data on surface water monitoring

Training & Skills

- 40-hour HAZWOPER training with current 8-hr refresher certificate
- DOE RadWorker II training
- Proficient in managing staff in both office setting and in environmentally challenging conditions; Proficient in In-Situ Inc., YSI, Hach, Horiba surface water monitoring equipment and software
- Adept at processing and interpreting raw field data for use in reports accessible to the layperson
- Worked to CERCLA, RCRA and Clean Water Act regulations and permitting in multiple settings
- Microsoft Word, Powerpoint, Excel and Project user
- Team player having strong interpersonal skills
- Active DOE "Q" Clearance

Education

Tennessee Technological University, Cookeville, Bachelor of Science- Wildlife and Fisheries Management/Biology

Employment History

Restoration Services Inc.(RSI), Oak Ridge, Tennessee (08/11 – Present)

Environmental Scientist

- Presently serves as project lead on the continuous groundwater level monitoring project within the U.S. Department of Energy (DOE) Oak Ridge Reservation (ORR) Water Resources Restoration Program (WRRP). Responsibilities include managing a staff to sample, monitor and maintain a network of over one hundred locations per CERCLA regulations throughout radiologically controlled areas of the ORR, including the Oak Ridge National Laboratory (ORNL) solid waste storage areas (SWSAs) and the Environmental Management Waste Management Facility (EMWMF) and Bear Creek Valley.
 - With staff, responsible for all hydrologic and geophysical data processing and interpreting for the WRRP
 - Procures and maintains monitoring equipment and supporting documentation
 - Works closely with DOE RadCon support to monitor, document and model hydrologic (both surface and groundwater) dynamics throughout Bear Creek Valley, Melton Valley and Watts Bar watersheds per CERCLA, EPA and TDEC regulations
 - Set up and maintain remote data collection telemetry systems and surface water networks

- o Leads surface water sampling efforts throughout ORNL and Y-12 facilities in support of WRRP deliverables
- o Use Flowlink and In-Situ Inc. software for interpreting and processing weekly, monthly and quarterly hydraulic data. Leads daily safety briefings for field sampling teams

Commodore Advanced Sciences Inc. (through RCS Corporation), Oak Ridge, Tennessee (12/04- 08/11)

Sampling Technician

- Supported the Environmental Data Acquisition and Management Project which included soil, groundwater, and surface water monitoring efforts on the DOE Oak Ridge Reservation
- Utilized a variety of groundwater and surface water quality monitoring methods and equipment including Westbay, Isco, and Horiba sample collection systems
- Followed U.S. Environmental Protection Agency and U.S. Department of Transportation requirements for shipping and storage of contaminated samples
- Maintained the daily, living log of activities

MDM Services Corporation, Oak Ridge, Tn. (11/02-12/04)

Sampling Technician

- Served as an Environmental Sampling Technician on the U.S. Department of Energy (DOE) Oak Ridge Reservation (ORR)
- Conducted routine sampling, monitoring, and data collection; calibrating, arranging, and operating field and laboratory instrumentation equipment used in collecting environmental samples and data
- Followed defined and detailed plans and procedures to manually or automatically collect environmental samples such as air, water, soil, vegetation, and waste samples
- Handled samples properly to prevent contamination; conducting field measurements such as pH, temperature, dissolved oxygen, conductivity, and turbidity
- Verified sample accountability by facilitating chain of custody
- Documented findings and compiling the data and submitting for interpretation; acting as a field supervisor; working closely with project management and customers to complete required sampling projects

American Aquatics, Inc. Oak Ridge, Tennessee (02/02-11/02)

Sampling Technician

- Responsible for collecting and processing macro-invertebrate samples
- Performed stream assessments using benthos and fish populations, backpacking and electroshocking
- Performed habitat assessments and ecological risk assessments
