Experience

Inspector/operator Rescar

01/2015 to Current
Baton Rouge, LA

My duties consist of operating the trackmobile to pull and push cars on the track to their proper destination. Once the cars are spotted they are inspected to meet FRA standards. Change air line hoses, brake pads, air blow inside of cars, and scrap the inside of them. Also we check all fluid levels for the machineary we use and record it on our log. Switching is included too.

Unloader Railserve

09/2010 to 08/2014
St. James, LA

My duties consisted of unlading crude oil from tank cars. My job was to vent the railcar from the top using a safe method. The next step was using a 36 inch pipe wrench to open the belly cap at the bottom of the car. Next step is ti install a elbow in the opening then attaching a hose to it, Finally you pull the Bov handle valve to begin pumping. Record data on track inspection sheet.

Piledriver Bomac Contractors

05/2010 to 04/2012
New Orleans, LA

Supervised equipment returns, including obtaining all relevant data. My duties consisted of rigging, recording the number of drives thats being applied. Also I fire watched and troubleshooting on various heavy machineary. I used the man lift to accomplish certain work assignments as well.

Labor Bk Contractors

10/2008 to 01/2010
Slidell , LA

Examined systems to locate problems such as loose connections and broken insulation. My duties consited of being an operator to run conveyour belts holding grain and other products. Aldo i unladed bargres on the river, using the proper rigging. Lastly i operated the front end laoder throughout the plant.
