PROFESSIONAL EXPERIENCE

D-Check Developments, Inc.
Milner, GA

Supervisor/Manager Lead Welder & Fabricator
May 2014 - Present

- Assign work schedules, following work requirements, to ensure quality and timely delivery of service.
- Inspect work areas or operating equipment to ensure conformance to established standards in areas such as cleanliness or maintenance.
- Train workers in proper operational procedures and functions and explain company policies.
- Observe and evaluate workers' appearance and performance to ensure quality service and compliance with specifications.
- Determine schedules, sequences, and assignments for work activities, based on work priority, quantity of equipment, and skill of personnel.
- Monitor employees' work levels and review work performance.
- Monitor tool and part inventories and the condition and maintenance of shops to ensure adequate working conditions.
- Investigate accidents or injuries and prepare reports of findings.
- Recommend or initiate personnel actions, such as hires, promotions, transfers, discharges, or disciplinary measures.
- Compile operational or personnel records, such as time and production records, inventory data, repair or maintenance statistics, or test results.
- Develop, implement, or evaluate maintenance policies and procedures.
- Counsel employees about work-related issues and assist employees to correct job-skill deficiencies.
- Perform skilled repair or maintenance operations, using equipment such as hand or power tools, hydraulic presses or shears, or welding equipment.
- Meet with vendors or suppliers to discuss products used in repair work.
- Compute estimates and actual costs of factors such as materials, labor, or outside contractors.
- Review, evaluate, accept, and coordinate completion of work bid from contractors.
- Interpret specifications, blueprints, or job orders to construct templates and lay out reference points for workers.
- Design equipment configurations to meet personnel needs.
- Operate safety equipment and use safe work habits.
- Weld components in flat, vertical, or overhead positions.
- Ignite torches or start power supplies and strike arcs by touching electrodes to metals being welded, completing electrical circuits.
- Clamp, hold, tack-weld, heat-bend, grind or bolt component parts to obtain required configurations and positions for welding.
- Detect faulty operation of equipment or defective materials and notify supervisors.
- Operate manual or semi-automatic welding equipment to fuse metal segments, using processes such as gas tungsten arc, gas metal arc, flux-cored arc, plasma arc, shielded metal arc, resistance welding, and submerged arc welding.

- Monitor the fitting, burning, and welding processes to avoid overheating of parts or warping, shrinking, distortion, or expansion of material.
- Examine work pieces for defects and measure work pieces with straightedges or templates to ensure conformance with specifications.
- Recognize, set up, and operate hand and power tools common to the welding trade, such as shielded metal arc and gas metal arc welding equipment.
- Lay out, position, align, and secure parts and assemblies prior to assembly, using straightedges, combination squares, calipers, and rulers.
- Chip or grind off excess weld, slag, or spatter, using hand scrapers or power chippers, portable grinders, or arc-cutting equipment.
- Analyze engineering drawings, blueprints, specifications, sketches, work orders, and material safety data sheets to plan layout, assembly, and welding operations.
- Connect and turn regulator valves to activate and adjust gas flow and pressure so that desired flames are obtained.
- Prepare all material surfaces to be welded, ensuring that there is no loose or thick scale, slag, rust, moisture, grease, or other foreign matter.
- Select and install torches, torch tips, filler rods, and flux, according to welding chart specifications or types and thicknesses of metals.
- Remove rough spots from work pieces, using portable grinders, hand files, or scrapers.
- Position and secure work pieces, using hoists, cranes, wire, and banding machines or hand tools.
- Clean or degrease parts, using wire brushes, portable grinders, or chemical baths.
- Repair products by dismantling, straightening, reshaping, and reassembling parts, using cutting torches, straightening presses, and hand tools.
- Fill holes, and increase the size of metal parts.
- Check grooves, angles, or gap allowances, using micrometers, calipers, and precision measuring instruments.
- Gouge metals, using the air-arc gouging process.
- Estimate materials needed for production and manufacturing and maintain required stocks of materials.

US ARMY
Savannah, GA

Infantry Squad Leader
May 2001- May 2011

- 11B Squad Leader in a Light Infantry Company; responsible for the welfare, fitness, morale and discipline of nine Soldiers; responsible for the individual training and maintenance of their equipment; primary instructor and adviser in the matters of tactics, personnel management and junior leader development; directs his Squad's tactical employment during offensive and defensive operations; responsible for the accountability and maintenance of all assigned Modified Table of Organization & Equipment. Equipment worth in excess of 5,000,000 dollars.

- Test drive vehicles, and test components and systems, using equipment such as infrared engine analyzers, compression gauges, and computerized diagnostic devices.
- Examine vehicles to determine extent of damage or malfunctions.
- Repair, reline, replace, and adjust brakes.
- Follow checklists to ensure all important parts are examined, including belts, hoses, steering systems, spark plugs, brake and fuel systems, wheel bearings, and other potentially troublesome areas.
- Confer with customers to obtain descriptions of vehicle problems, and to discuss work to be performed and future repair requirements.
- Perform routine and scheduled maintenance services such as oil changes, lubrications, and tune-ups.
- Repair and service air conditioning, heating, engine-cooling, and electrical systems.
- Test and adjust repaired systems to meet manufacturers' performance specifications.
- Review work orders and discuss work with supervisors.
- Tear down, repair, and rebuild faulty assemblies such as power systems, steering systems, and linkages.
- Plan work procedures, using charts, technical manuals, and experience.
- Disassemble units and inspect parts for wear, using micrometers, calipers, and gauges.
- Repair or replace parts such as pistons, rods, gears, valves, and bearings.
- Rewire ignition systems, lights, and instrument panels.
- Install and repair accessories such as radios, heaters, mirrors, and windshield wipers.
- Maintain cleanliness of work area.
- Repair or replace shock absorbers.
- Replace and adjust headlights.
- Overhaul or replace carburetors, blowers, generators, distributors, starters, and pumps.
- Repair radiator leaks.
- Align vehicles' front ends.
- Rebuild parts such as crankshafts and cylinder blocks.
- Repair damaged automobile bodies.
- Test drive vehicles, and test components and systems, using equipment such as infrared engine analyzers, compression gauges, and computerized diagnostic devices.
- Examine vehicles to determine extent of damage or malfunctions.
- Repair, reline, replace, and adjust brakes.
- Follow checklists to ensure all important parts are examined, including belts, hoses, steering systems, spark plugs, brake and fuel systems, wheel bearings, and other potentially troublesome areas.
- Confer with customers to obtain descriptions of vehicle problems, and to discuss work to be performed and future repair requirements.
- Perform routine and scheduled maintenance services such as oil changes, lubrications, and tune-ups.
- Repair and service air conditioning, heating, engine-cooling, and electrical systems.
- Test and adjust repaired systems to meet manufacturers' performance specifications.
- Test and adjust repaired systems to meet manufacturers' performance specifications.
- Review work orders and discuss work with supervisors.
- Tear down, repair, and rebuild faulty assemblies such as power systems, steering systems, and linkages.
- Plan work procedures, using charts, technical manuals, and experience.

Woodco
Loganville, GA

Carpenter
May 1996- May 1999

- Study specifications in blueprints, sketches, or building plans to prepare project layout and determine dimensions and materials required.
- Shape or cut materials to specified measurements, using hand tools, machines, or power saws.
- Follow established safety rules and regulations and maintain a safe and clean environment.
- Measure and mark cutting lines on materials, using a ruler, pencil, chalk, and marking gauge.
- Install structures or fixtures, such as windows, frames, floorings, trim, or hardware, using carpenters' hand or power tools.
- Verify trueness of structure, using plumb bob and level.
- Build or repair cabinets, doors, frameworks, floors, or other wooden fixtures used in buildings, using woodworking machines, carpenter's hand tools, or power tools.
- Assemble and fasten materials to make frameworks or props, using hand tools and wood screws, nails, dowel pins, or glue.
- Remove damaged or defective parts or sections of structures and repair or replace, using hand tools.
- Erect scaffolding or ladders for assembling structures above ground level.
- Finish surfaces of woodwork or wallboard in houses or buildings, using paint, hand tools, or paneling.
- Select and order lumber or other required materials.
- Perform minor plumbing, welding, or concrete mixing work.

EDUCATION

Henry County High School
McDonough, GA

1996-2000
DIPLOMA

ADDITIONAL SKILLS

- Certified in 6g Mig Welder
- Certified in Tower Climbing
- Proficient with Gas and Diesel Engines.
- Leadership Skills
