PROFILE

I am a highly motivated and equally skilled Electronic Engineer / Technician. I am eagerly searching for an opportunity to utilize the knowledge I've gained through my university studies, and the skills and experience I have acquired during my time as a novice engineer.

EDUCATION

The University of Kansas— Bachelor of Science in Electrical Engineering - 2013

* 3.6 GPA

* Emphasis on RF Electronics

* 90+ hours toward BSEE; equivalent to AAS+

PROFESSIONAL EXPERIENCE

CENTER FOR REMOTE SENSING OF ICE SHEETS (CRESIS); LAWRENCE, KANSAS — 2012-2013

RESEARCHER / ENGINEERING TECHNICIAN

- * Assisted in the design and implementation of high-power Remote-Sensing / Radar systems for NASA
- * Utilized Genesys and ADS software (Line-Calc, CPWG, etc.) to design RF circuitry
- * Conceptualized, designed, milled, populated, tested and optimized PCBs
- * Designed Analog and Digital circuitry
- * Conducted research for doctoral candidates

UTC AEROSPACE; BANGALORE, KARNATAKA, INDIA — 2012
TEST ENGINEERING CONSULTANT (10 MONTH CONTRACT)

- * Oversaw implementation of optimized fabrication and testing processes for transfer of operations to newly implemented Bangalore, India facility
- * Authored test instructions and designed test fixtures for Altimeter and Radar equipment
- * Authored test instructions and designed test fixtures for Wire-Harnesses
- * Purchased and implemented test equipment including Network / Spectrum Analyzers
- * Trained staff of 30+ technicians, engineers and quality assurance inspectors in India

INTEGRA TECHNOLOGIES, LLC; WICHITA, KANSAS — 2011-2012

TEST ENGINEER (INTERNSHIP)

- * Responsible for burn-in, temperature/humidity and functional analysis of Semiconductors / Integrated Circuits
- * Utilized a mixture of AutoCAD and OrCAD to design custom PCBs for Analog, Digital, Mixed-Signal and RF / Microwave Applications
- * Authored test programs in C and Ruby languages for Dynamic and Static testing
- * Utilized Modelsim and Alterra Quartus II to design Digital Logic for FPGAs and Microcontroller devices
- * Assisted Technicians in troubleshooting circuitry problems down to component level
- * Designed test fixtures and bench set-ups
- * Assisted in managing a group of 10+ technicians and operators
- * Prototyped new designs for senior engineers

INTEL; FORT COLLINS, COLORADO — SUMMER 2010

TEST ENGINEER (INTERNSHIP)

- * Introduced to basic EDA principles and methodology
- * Designed basic digital circuitry
- * Simulated digital logic in VHDL using Modelsim
- * Documented engineering data
- * Prototyped devices for senior engineers

CORE COMPETENCIES

- * High proficiency with soldering SMD and through-hole
- * Component-level troubleshooting
- * Circuit design for Analog, Digital, and RF / Microwave technologies
- * Multi-layer PCB design for Analog, Digital and RF / Microwave application
- * PCB milling with LKPF machinery
- * Test equipment (DMM, O-scope, Power Meter, Network Analyzer, Pattern Generator, Power Supply)
- * Schematic Capture / PCB Layout programs including Altium, Eagle, AutoCAD OrCAD
- * Circuit Simulation tools including Multisim, PSpice, Tina and LTSpice
- * RF / Microwave simulation / PCB Layout tools including Agilent ADS and Genesys
- * Smith Chart experience
- * Digital Design in Modelsim and Quartus II and VHDL / Verilog proficiency
- * Proficiency with Matlab, Simulink and Labview
- * Programming Microcontroller, FPGA, PLD and NAND Flash Memory devices
- * Novice proficiency with Perl, Ruby, Assembly and C programming languages
- * Mastery of all Microsoft Office and Mac Office Suite software
