Welding Skills I am fluent in the process of s.m.a.w or stick welding along with m.i.g welding. 7 years experience welding, fitting and metal fabrication Fabricating Skills Able to accurately layout, cut, assemble and weld job start to finish. Able to operate a wide variety of welding equipment and use many different techniques.

Employment History

Food Service Worker

05/2013 - Current Moe's Southwest Grill Panama City, FL

My job duties include preparing, cooking and serving food to customers. Cash handling transactions , kitchen maintenance , marketing and advertising , preparing and delivering catering orders.

welder/fitter

09/2012 - 05/2013 Eastern Marine Shipbuilding Group Panama City, FL

My responsibilities included building trans Atlantic oil supply vessels that are currently operating in Brazil. These vessels are newly constructed and are state of the art I am proficient in reading prints ,modular construction and welding as well as using cutting torches.

welder/fitter

05/2012 - 09/2012 Marine Inland Fabricators Sothport, FL

While employed at M.I.F my duties included stick welding, MIG welding and also fitting and fabrication on many different inland water push / tug boats.

Food Service Worker

12/2011 - 05/2012 Moe's Southwest Grill Panama City, FL

My job duties included preparing, cooking and serving food to customers. Cash handling transactions , kitchen maintenance , marketing and advertising , preparing and delivering catering orders.

Welder/Plant Maintenance

02/2011 - 02/2011 Weldco Panama City, FL

During the time I worked on this shut-down I and a four man crew were responsible for completely locking out and entering the evaporators and flushing the tanks and tubes. We were also responsible for changing out all seals and gaskets. I and another team member were then responsible for repairing and welding steam lines, and various piping along the paper machine.

Ship fitter

07/2009 - 03/2010 Eastern Marine Shipbuilding Panama City, FL

My responsibilities included various techniques for building newly constructed oil supply vessels. I used a wide variety of tools and knowledge to erect and assemble modular constructed sections that would later be transformed into 298' vessels. After 4 months of building modular sections I began working on the erection crew using multiple cranes, steamboat jacks, ratchet lever hoist etc. to attach these units. All work of course was done in compliance with O.S.H.A regulations and in a timely fashion in a production environment.

Factory Hand

03/2009 - 07/2009 B&A Manufacturing West Palm Beach, FL

03/12/09-07/16/09 B&A Manufacturing West Palm Beach FL Maintenance/Welder Painter/Sandblast Responsibilities included degreasing, blasting and painting of drills. Maintenance of all equipment used in this process along with minor repairs. Also learned the unique process of blackening and plating.
