

OBJECTIVE:

To obtain challenging position in a well reputed organization where my education, technical skills and hard work can be fully and utilized in a constructive manner so that myself as well as the society are the beneficiaries.

WORK EXPERIENCE:

Project Engineer at Envirochem Laboratories Pvt Limited, India

August 2008 - July 2012

Key Responsibilities

- Erection, Commissioning and operation of Waste Water Treatment Plant / Sewage Treatment Plant / Reverse Osmosis Plant/ Ultra Filtration / Demineralization plant etc.
- Revamping of existing Waste Water Treatment Plant / Reverse Osmosis Plant
- Handled Design, Erection, Commission and operation of various type of projects like Textile Dyeing Industries, Chemical Industries, food and beverage, automotive, Rubber latex, Hotels, Hospitals etc.
- Chemical treatment of effluent and sewage water.
- Biological process includes aerobic and anaerobic treatment.
- Installation and operation of filter press.
- Installation and maintenance of Incinerators.
- Installation and Maintenance of biogas Plant.
- Supervising Plant Operation and Maintenance.
- Managing & Handling Sludge drying beds.
- Effluent & Water Analysis.
- Report Preparation (Annual, Quarterly and Monthly) as well as Health and Safety Plans, Operation and Maintenance Plans, and Sampling and Analysis Plans.
- Housekeeping

Environmental Consultant at Tamilnadhu Co-operative Textile Processing Mills, India

April 2010 – July 2011

- Maintain zero-Liquid discharge system for the Tamilnadhu Co-operative textile Processing Mill.
- Operation and Maintenance of Effluent Treatment & Reverse Osmosis plant of capacity 500 m³/day
- Operation and maintenance of Dye bath Treatment Plant.
- Operation of filter press and sludge drying bed.
- Operation and Maintenance of Multiple effect evaporators.
- Water sample collection.
- Analysis of effluent and Reverse Osmosis water including BOD, COD and other parameters

Research Assistant at National Institute of Interdisciplinary Science and Technology (CSIR), India

July 2012 – May 2013

- Operation of Raceway pond reactor, analyzing the conditions and monitoring the biomass physiological characteristics.
- Qualitative and Quantitative estimation of Lipid content in the microalgal biomass.
- Chemical and biological analysis such Nitrogen, Phosphorous, Silica, calcium, Iron, Sodium, potassium.
- Operation of online instruments such as Thetys UV 400 water sample analyser, Mettler Toledo dissolved oxygen meter, pH electrode and M300 transmitter, Isco 3230 Bubbler flow meter, Pyranometer, Photosynthetically active radiation sensor, various types of peristaltic pump and syringe injection pump as well as laboratory equipments such as fluorescent microscope, stereo microscope, Lyophilizer, UV-VIS Spectrophotometer, Microwave accelerated reaction system, Ammonia analyser, flame photometer, ultra – Centrifuge, Distillation unit, Ion Chromatography, TOC instrument and cell disruption unit.

Government Contract Administrator at JJ Industries Inc, Collingdale- PA 19023

June 2013 – Present

- Reviews solicitations, RFP's, RFQ's to ensure compliance with terms and conditions.
- Prepares and submits cost proposals including pricing and scheduling details, coordination of requirements, and cost proposal risk assessment.
- Preparation of purchase order and invoices.
- Preparing shipping documentation including VSM/ WAWF/RFID creation etc.
- Military Packaging include packaging slip, shipping label etc.
- Communicates award/loss info to Senior Management and Estimating to assist in determining the effectiveness of the quote.

EDUCATION:

Masters Degree in Environmental Engineering (2011- 2013)

- Manipal University, Karnataka, India

Bachelor's Degree in Chemical Engineering (2004- 2008)

- Kerala University, Kerala, India

LEADERSHIP AND ACHIVEMENTS:

- Organized various competitions on “Earth Day” (Dharani-2012) in MIT, which was funded by the Ministry of Earth Sciences, India and organized the whole fest with my team mates.
- Executive Member of BUDS (Biotechnology Union for the Devolepment of Society) , Student’s organization of Biotechnolgy and Biochemical Engineering
- Organizing and participated in national level on campus programs like Biogenix and Elucido

SKILLS & QUALIFICATION:

Languages:

- English and Malayalam

Environmental Engineering Attributes

- A good knowledge about OSHA and Environmental Impact Assessment.
- Analysis of water and waste water.
- Assessing the environmental impact and risks connected to projects.
- Finding out the solutions related to the environmental related risks and problems.
- Monitoring and operation of 500 MLD Reverse Osmosis Plant.
- Can Operate UV-VIS spectrophotometer, pH meter, DO meter, Flame Photometer, Accelerated wet digester.

Computer:

- Expert in Programming & Languages: (C++, C# , ASP.NET).
- Operating Systems: Windows 98/2000/XP/Vista/Windows 7, Linux, UNIX, Mac.
- Good command over Microsoft Office Tools (Word, Excel and Power Point).
- Basic knowledge of Matlab.

Qualifications:

- Hard working, energetic and positive.
- Excellent customer service skills.
- Adapt easily to change of work schedule.
- Good communication (written, verbal).
- Good time management skills and detail oriented.
- Flexibility in dealing with different personalities.
- Proficient at setting priorities, organizing tasks, and working independently.
