SUMMARY

Chemistry / Biochemistry Professional

Diversified chemist with over 5 years experience in various lab procedures utilizing skills acquired from both academic disciplines and on the job training.

SKILLS

- Preparation and PCR amplification
 - Gel Electrophoreses
 - Perform enzymatic reactions
 - Standard wet chemistry
 - Chemistry lab instruments and techniques
 - Reagent preparations including mixing and dilutions
-

EXPERIENCE

Cargill Salt, Newark, CA

QA Lab Technician

09/13 to 06/15

Test salt additives using various methods including gravimetric analysis on in process salt. Proficient in all laboratory operations, and implemented improvements making procedures easier, including diluting certain chemicals when required. Strong knowledge of chemicals used, and knowledgeable in quantitative and qualitative analysis, and data interpretation. Also experienced in SAP system.

- Perform purity analysis on brine of finished salt samples to determine quantities of calcium, magnesium and sulfur
- Determine granulation of finished salt particles by screening samples through GradeX and Rotap
- Enter data on finished goods into SAP for quality assurance and shipping purposes including generation of the Certificate of Analysis

Seeo, Hayward, CA

Chemistry Technician

04/13 to 09/13

Chemistry technician for start-up battery company. Performed key tasks to complete mixing study. Mixing study was approved to determine which formulations of active material would produce the most energy. Mixing required weighing, and preparation of compounds using jars, stir plates, stir bars and fume hood to achieve desired results. Also maintained and organized essential lab supplies and fume hood.

- Mixed Lithium Phosphate for batteries
- Used, cleaned and maintained glove box

EMD Millipore, Hayward, CA

Chemistry Technician

06/12 to 09/12

Chemistry technician for Reagent Company. Prepared reagents and reagent kits for resale. Reagents were prepared using an SOP with available chemicals in inventory. The average order required

preparation of 4-6 Liters of reagent. The entire preparation, bottling and packing kits, took several days to complete. Also organized and rearranged storeroom refrigerator and freezer.

- Packed kits for resale by inserting reagents and package inserts
- Bottled reagents using the omnispense dispenser

Air Liquid, Fremont, CA

Lab Technician

06/10 to 08/10

Maintain lab and lab equipment to assist in fulfilling orders. Kept all sample containers clean by leeching and oven drying. Containers were to be used with samples delivered and tested in the clean room.

- Worked with water purifiers during sterilization testing procedures
- Sterilized sample containers by using purified water and leeching methods
- Prepared containers for gas samples by cleaning with solvent

Intuity Medical, Sunnyvale, CA

Chemistry Technician

06/09 to 02/10

Prepared standard curve of blood samples with exact glucose readings. Working with a team, also tested each individual glucose monitoring device against known preparations of blood samples. Team also graphed this data and made conclusions on the performance of each device. Team also utilized pipetting, calculation and chemistry skills.

- Worked with reagent formulations and dilutions for various chemical testing
- Followed SOP's and MSDS'

EDUCATION

B.S. Biochemistry and Molecular Biology

June 2009

University of California, Davis, Davis, CA

A.S. Physical Sciences

June 2007

Mission College, Santa Clara, CA

GRANTS

SMART Grant

University Grant

LANGUAGES

Fluent in Vietnamese
