

Rick Crume
Environmental / Instrumentation / Computer Specialist

248 Iron Mtn. Rd. E.
Hartford, KY 42347

Phone: 502-767-8262
crume_rick@yahoo.com

CREDENTIALS:

- A.S. Environmental/Mine Reclamation Technology, University of Kentucky/MCC
- Certified Nondestructive Testing Technician (NDT/Instrumentation), DOE/Oak Ridge Associated Universities
- Microsoft Certified Professional – (MCP), New Horizons Computer Learning Center
- Microsoft Certified Systems Engineer – (MCSE), New Horizons Computer Learning Center
- DOD Security Clearance / Background Check - 2012
- Hazardous Waste Operations and Emergency Response (40 hour HAZWOPER) Certification
- BP Post Emergency Spilled Oil Cleanup Certification
- UST Remover Certification
- Visible Emissions Evaluator (EPA Method 9) Certification
- Industrial Radiation Safety Certification
- Red Cross First Aid / CPR Safety Training Certification
- Philip Crosby Total Quality Management System Training Certification
- Statistical Process Control (SPC)

FIELDS OF EXPERTISE:

Environmental:

- Project Management, Bids/Proposals, and performance of air emissions, subsurface investigations and remediation projects
- Phase 1, Phase 2, and Phase 3 Environmental Site Assessments, UST Removals & Closure Assessments, Monitor Well Installations, Aquifer Testing, and Soil / Groundwater Remediation conducted under State of Florida (FDEP) Guidelines
- Industrial Air Emissions, Fugitive Emissions, Soil, Groundwater, Wastewater, and Stormwater Compliance Permitting, Monitoring emissions calculations and Reporting
- Marine/marsh environmental impact investigations conducted under USEPA and NOAA guidelines
- Environmental Sustainability, Industrial Haz/Non-Haz Waste management, storage, labeling, disposal and recycling monitoring and reporting
- EH&S Plans/Audits/Training: PPE, Bloodborne Pathogens, Fire/Chemical Emergency, Lockout/Tagout
- Wastewater and Stormwater Treatment Plant Operations, Monitoring and Troubleshooting
- Title V, MACT/BACT, NSR, HAP Emissions Inventories, SWPPP, SPCC, NPDES Permitting, RCRA Hazardous Waste

Instrumentation:

- Operation, calibration, troubleshooting, and repair of industrial stack testing/continuous emissions monitoring systems (CEM's), process control instrumentation, and air pollution control devices
- Operation, troubleshooting, repair and training personnel and clients on industrial process control instrumentation (programmable controllers, data loggers flow, level, temperature, pressure monitors/controllers, etc.), analytical scientific instrumentation (HPLC, GC, AA, FTIR, UV-VIS, Laser, X-RAY), and computerized control systems
- Geophysical Testing (wireline logging) – Oil, Gas, Coal Exploration / Underground Storage Cavern Testing

Computer:

- Computer, process control, and testing instrumentation software applications
- NT 4.0 Server, Win 2K Server, SQL 7 Server, Win 9.X – 7, MSOffice Suite 9.X – 2010, MapSource (GPS), Google Earth, Microsoft Visio, Adobe Acrobat X, Adobe Photoshop, Active Directory, LAN, WAN, WLAN, TCP/IP, DHCP, DNS, WINS
- Microsoft applications such as Word, Access, and Excel including tables, charts and graphs
- Computer network administration, hardware/software installation, configuration, troubleshooting, and help desk

WORK EXPERIENCE:

Field Service Engineer: **Granite Services International, Inc. (Affiliate of GE Power & Water), Tampa, FL** **2014**
Temporary contract position operating mobile water treatment systems and associated process controls and monitoring instrumentation for client industries throughout the U.S. assisting with process water and environmental wastewater quality improvements.

WORK EXPERIENCE (cont'd):

Sr. Environmental Technician: Mosaic Fertilizer, LLC, Tampa, FL 2013 to 2014

Performed air emissions testing, continuous emissions monitor certifications (RATA's), instrumentation operation, calibration, troubleshooting and repair, engineering studies on process emissions, air emissions reports and EHS audits at Mosaic's chemical processing plants in the South Central Florida region.

Environmental Restoration Program Mgr.: Versar, Inc. @ US Army Env. Mgmt. Div., Fort Knox, KY 2011 to 2012

Temporary contract position managing subsurface remediation projects and issues in support of environmental improvement efforts at the Fort Knox Army Base. Projects include multi-million dollar remediation, environmental compliance/clean-up and long-term monitoring projects managed through the US Army Corps of Engineers, Army Environmental Command and Fort Knox Environmental Management Division. Performed and participated in facility audits. Submitted project funding requests, budget tracking reports and continually updated the Army Environmental Project/Budget Management Databases.

Environmental Specialist: Dade Moeller & Assoc's, Baton Rouge, LA 2011

Temporary contract position performing project coordination, data and sample intake and review (marine/marsh sediments, waters, flora/fauna, GPS coordinates), and QA/QC for the *National Oceanic and Atmospheric Administration (NOAA) Deepwater Horizon Oil Spill Natural Resource Disaster Assessment (NRDA)* in the U.S. Gulf Coast area.

Project Manager / Environmental Specialist: NSS Environmental, Louisville, KY 2011

Temporary contract position managing, preparing and implementing Environmental Management Plans (waste and recycling tracking), Facility Care Plans (EH&S Plans and Training), Air Emissions Compliance Test Plans, Air Quality Permitting, Facility Audits, and HAP Emissions Inventories for client industries in the greater Kentuckiana area.

Scientific Instrumentation / Computer Specialist: University of Louisville, Dept. of Chemistry, Louisville, KY 2006 to 2010

Performed installations, upgrades, troubleshooting, repair and calibration of laboratory instrumentation and computers for research groups, educational laboratories and faculty/administration. Installed and upgraded software, drivers, and configured computers for office/lab environments, laboratory instrumentation control systems, LAN, WAN and wireless network access.

Environmental Specialist: CSX Transportation / Environmental Operations, Nashville, TN 2005 to 2006

Temporary contract position managing and operating wastewater and stormwater treatment plants at a major railroad terminal. Responsible for operation of treatment plants and associated control instrumentation, waste oil collection/recycling, hazardous/non-hazardous waste management, recycling and/or disposal, supervision of surface and subsurface remediation, and Environmental Health and Safety. Conducted *Environmental Certification Training and Health, Safety, and Security Awareness Training* for CSX management and operations personnel.

Manager (between full-time jobs): Crume Picture Framing, Hartford, KY 2002 to Present

Work part-time performing art sales and framing assembly while seeking long-term employment in my field.

Project Manager / Environmental Specialist: Resource Consultants / Dames & Moore, Brentwood, TN 1994 to 2002

Managed and performed environmental compliance testing operations (air emissions testing, instrumentation operation, calibration, troubleshooting and repair), UST removals and closure assessments, subsurface investigations, remediation and site safety plans for industrial clients throughout the midwest and southeast U.S.

Environmental Service Technician: American Air Filter, Louisville, KY 1994

Performed start-up, testing and troubleshooting on large industrial air pollution control devices and associated instrumentation/control systems for client industries throughout the U.S. and Canada.

Project Manager / Sr. Environmental Scientist: Earth Science Technologies, Inc., Louisville, KY 1990 to 1993

Managed and performed UST removals and closure assessments, environmental subsurface investigations and remediation for client industries throughout the Midwest and Southeast U.S.

Sr. Environmental Technician: Simpson Paper Co./Champion Int'l. Corp., Pasadena, TX 1984 to 1990

Performed environmental compliance monitoring operations (continuous air, wastewater, stormwater monitoring, laboratory analyses and reporting) and EHS compliance at a major pulp and paper mill.

Geophysical Logging/ Wireline Engineer: Micro Gage, Inc., Houston, TX 1981 to 1984

Performed geophysical testing for oil, gas, refineries and underground storage cavern facilities throughout the U.S. Gulf Coast along with coal exploration in the Rocky Mtn. regions.

Geophysical Logging/ Wireline Engineer: AMCA Resources, Inc., Madisonville, KY 1980 to 1981

Performed geophysical testing for coal exploration throughout Eastern U.S. coalfield regions.
