Objective:

Seeking a full-time entry-level professional position in which I can apply my technical, scientific, and analytic problem solving skills and contribute to the company's overall goals.

Education:

University of Colorado Denver, Denver, Colorado
Bachelor of Science: Applied Physics, Minor: Mathematics
Graduation May 2014

Relevant Courses:

- Probability and Statistics
- Calculus I, II, III
- Differential Equations
- Linear Algebra
- Problem Solving Tools
- Math Methods for Physical Sciences
- Modern Physics I, II
- Vibrations and Waves
- Thermodynamics
- Classical Mechanics
- Quantum Mechanics
- Electricity and Magnetism

Projects:

Math Methods: *Special Relativistic Correction to Newtonian Orbits* Spring 2013
-- Applied principles of special relativity to correct the classical Newtonian orbit model, which was not in agreement with observational data.

Biophysics: *A Brief Overview of Quantum Dots* Fall 2013
-- Presented a mathematical model of a one-dimensional quantum dot and described its potential uses in the medical industry.

Statistics: *Preparedness in the Mountains* Spring 2014
-- Conducted a survey to statistically examine how prepared people were at the time they attempted their first fourteener.

Senior Physics Lab: *Quantum Transmission Probability for an Asymmetric Periodic Potential* Fall 2013 and Spring 2014
-- Designed a MATLAB program to calculate and plot the transmission probability of a quantum particle through an asymmetric periodic potential configuration as a function of energy using the transfer matrix method.

Computer Skills:

MATLAB, LaTeX, Microsoft Office Applications
