

Paul Alexander

23021 Lofall Lane Grass Valley, CA 95949

T: (530) 268-7241 M: (530) 263-2177

E: palxnder@gmail.com

OBJECTIVE: A position in Electronic Engineering

EDUCATION:
1990-1993 Bachelor of Science, Electrical/ Electronic Engineering
California State University, Sacramento

EXPERIENCE:

10/2000-11/2013 **DIRECTOR OF ENGINEERING**, C Ceronix Incorporated, Auburn, CA

- Project experience involving hardware and firmware design of CRT and LCD monitors for gaming, simulation, kiosk, digital signage, and other industrial applications
- Managing project timelines and tasks
- Writing production and test procedures
- Training individuals for production and testing
- Managing production
- Managing procurement of sourced components and assemblies from local and international vendors including travel for source inspection and fostering good relations
- ISO 9001 Quality program experience
- Managing team of Engineers and Product Assemblers, including hiring, termination, review, task/time and product assembly scheduling
- Managing Inventory to ensure continuous production while keeping capital and shipping expenditures to a minimum
- Obtaining product compliance and listings with Underwriters Laboratories, CSA, TUV, and Intertek
- Working with FCC EMI testing laboratories
- Working directly with customers, including order processing, technical support, and to facilitate the development of reliable, cost competitive products that meet or exceed specifications

2/1995-9/2000 **CHIEF ENGINEER**, RGB DISPLAY CORPORATION, Grass Valley, CA

- Project experience involving hardware and firmware design of CRT and LCD monitors for simulation, gaming, and other industrial applications
- Writing production and test procedures
- Training individuals for production and testing
- Managing Quality
- Developing hardware and firmware for infrared touch sensor, which combined micro-controller and complex programmable logic device (CPLD)
- Obtaining product listings with Underwriters Laboratories
- Working with FCC EMI testing laboratories
- Working directly with customers, including technical support, and development of reliable, cost competitive products that meet or exceed specifications

3/1994-5/1994 **ELECTRONIC DESIGN ENGINEER**, ENDOSONICS CORPORATION, Rancho Cordova, CA

- Project experience involving hardware design of infrared transmitter/receiver for a Diagnostic Intraluminal Ultrasound Imaging Product
- Worked with a Team of Engineers, developing circuitry, providing necessary documentation and meeting deadlines

SKILLS:

- Programming Languages: Fortran; Assembly (MC680XX, Microchip, and ST7, x86); C++; VHDL
- Systems: IBM, Hewlett Packard General Instrumentation Bus Equipment.
- Software: PLDshell Plus, Cypress Warp, PSPICE, Matlab, Viewlogic, OrCAD, Tango, Protel, SolidWorks, Auto CAD, Word, Excel, Publisher, PowerPoint

PERSONAL QUALITIES:

Team player; Work well with others in meeting goals in a timely manner; Organizing functions for Collegiate Kiwanis International includes running meetings, coordinating activities, publicizing events, and fostering participation; Den Leader Cub Scout Pack 787; Assistant Scoutmaster for B.S.A. Troop 53; Eagle Scout B.S.A. Troop 53
