Cell: 551-580-9285 • Email: rmp43@njit.edu

Objective To obtain a position in a Chemical Engineering Company where I can implement my knowledge and skills.

Education: **New Jersey Institute of Technology, Newark, NJ**

BS in Chemical Engineering, Expected Graduation: May 2015

Bergen Community College, Paramus, NJ

Associate in Science in Chemistry, Graduated May 2012

Key Courses: Analytical Chemistry, Physical Chemistry, Thermodynamics for Chemical Engineers, Heat and Mass Transfer, Separation Process and Chemical Engineering Lab

Honors and Awards:

Otto H. York Department of Chemical, Biological and Pharmaceutical Engineering's Merit Award Scholarship.

Skills: Data Analysis, Presentation and Public Speaking, Communication and Leadership skills, MS OFFICE MATLAB, ASPEN, and Polymath.

Projects: **Radiator Design for Advanced Coolant Project, New Jersey Institute of Technology, Junior year (2013).**

- I was a team member for the assigned project.
- The purpose of the project was to design a high efficiency car radiator for advanced coolant.
- MS Word and Auto Cad were used in the implementation of the project.
- The results obtained on the basis of the calculations proved the design to be more efficient.

Dike containment analysis, New Jersey Institute of Technology, junior year (2013).

- Safety assessment of storage tanks with detailed implementation and compliance of OSHA standards

Work

Experience:

New Jersey Institute of Technology, Newark, NJ

- Lab Consultant, Instructional Technology and Media Services, January 2014 - Present
- Helped Students and the professors with their computer issues.
- Assist students in creating accounts and help them log into the system.
- Configured printers and scanners.

Trenton Water Work, Trenton, NJ

Intern, June 2014 - August 2014

- Worked with a team of three interns on centrifugal pump efficiency- Identified improvements to the pumping system by analyzing the pump performance curve and potential design changes; evaluated the methods to increase the efficiency of the pump.
- Monitored and analyzed energy consumption.
- Completed project within deadline and presented to management and mentor.

Macys, Paramus, NJ

Sales Associate, September 2010 - August 2013

- Help customers with their specific needs regarding the merchandise.
- Trained new employees according to the company protocol.
- Maintained high level of customer service as per the feedback received by the customers.

Volunteer

Experience:

New Jersey Institute of Technology, Newark, NJ

Team leader, Alternate Spring Break 2014

- Helped in to rebuild a house that was affected by super storm sandy in Staten Island, NY

Professional Affiliations:

AICHE (American Institute of Chemical Engineers)

SWE (Society of Women Engineers)

AOCS (American Oil Chemists' Society)
