

David Espique

Summary

Laboratory management professional with 10 years of experience in environmental chemistry, microbiology-mycology, and industrial hygiene testing. Extensive experience in all aspects of laboratory compliance requirements as well as building, development, and management of staff and facilities across 4 laboratories spreading from San Diego to San Jose, CA in a rapidly growing environmental consulting and testing firm. Strong belief in heavy and continual training of all types of staff to ensure sound science, efficient operation, and improve employee retention.

Professional Experience

June 2003 – April 2014

Patriot Environmental Laboratory Services, inc.
Regional Laboratory Director, Technical and Quality Assurance Manager

- CA Department of Public Health Environmental Laboratory Accreditation Program Laboratory Director
- American Industrial Hygiene Association – EMLAP, ELLAP, IHLAP Technical and Quality Assurance Manager
- NVLAP Approved Signatory for Bulk Asbestos Analysis, Current and Interim Methods
- Health and Safety Manager; OSHA, NFPA, chemical and biological compliance and hazardous materials management
- Direct the design, construction, and overall development of branch laboratories; Statewide hiring and termination of laboratory personnel
- Manage research and development of existing and in-house test methods to increase productivity, profits, and marketability.
- Manage all aspects of quality control: statistics and trend reports, corrective action, cause-effect analysis, management reports, internal and external audits
- Training of all laboratory personnel in all laboratory aspects including lecturing in scientific background, theory, engineering and instrumentation, health and safety, methodology, quality control, statistics, and ethics
- Continual involvement in laboratory analysis with the lab team as a senior biologist
 - Participate in all required quality programs – asbestos, chemistry, microbiology
 - Sample preparation, analysis, reporting, QA/QC

- Operation, installation, maintenance, and light modification of company LIMS
- Networking, Maintenance, and security of computers and VOIP system. Installing and setting up virtual computers and remote desktops for branch laboratories.

Industrial Experience

- Brightfield/Light, Phase Contrast, Polarized Light, Fluorescence. Brief training in Transmission Electron and Scanning Electron Microscopy
 - Microscopy Instruction Consulting Analysis – Asbestos analysis by polarized light microscopy
 - McCrone Research Institute – Indoor air quality, fungal identification
 - Health Science Associates – NIOSH 582, Sampling and Evaluating Airborne Asbestos Dusts
- Method development and implementation for atomic spectroscopy of metals and compounds by FAAS, ICP-OES, GFAAS, XRF
 - Perkin Elmer – Short course in ICP-OES
- Isolation, cultivation, manipulation, identification and harvesting/cataloging of fungi from various aerosols, liquids, surfaces and diverse environmental conditions
- Training of chemists and biologists in modern and traditional analysis of asbestos, inorganic chemistry, and mycological/bacterial isolates: ecology, medical implications, engineering controls, societal impact.
- In-house instrument repair, tear-down and maintenance: atomic spectroscopy instruments, microscopes, fume hoods, biological safety cabinets, among other equipment (primarily Perkin Elmer and Buck Scientific instruments).
- Computer Hardware and OS Management, internal and long-distance networking, management and light programming of Laboratory Information Management System (MSAccess), Microsoft Office Suite

Activities

Memberships: American Chemical Society, American Academy for the Advancement of Science, American Society for Microbiology

Education

- 2001-2005 California State University, Fullerton Fullerton, CA**
- B.S. Biological Sciences - Molecular Biology and Biotechnology
Minor – Chemistry
