Summary of Qualifications

Technically oriented individual with a passion for learning new skills. Possesses international work experience. A problem-solver – loves solving puzzles. Possesses a strong work ethic, having held both a full-time job while attending school full-time. Experience in multiple scientific fields including Analytical Chemistry, Biology, Geology, and Toxicology. Has an interest in promoting safer daily lives, and lowering humanity's environmental impact.

Education

Jacksonville State University
Jacksonville, AL

January 2012 – December 2013
M.S. in Biology

- Studies in Biological principles (Ecological, Environmental, and Genetics)
- Focus in Toxicological Studies
- Thesis Research Project: Risk assessment study of common food-borne xenotoxins by means of Frog Embryo Teratogenicity Assay – Xenopus (FETAX)
- Taught four laboratory sections per semester including teaching and grading all laboratories and writing the exams for each course

Georgia Institute of Technology
Atlanta, GA

August 2001 – December 2007
B.S. Chemistry (Materials Option)

- Research Project: Used Infrared instrumentation and computer software to calculate very low ratios of materials in a crude mixture
- Research Project: Calculated amounts of components in a biological sample based on counts taken from Tandem Gas Chromatography - Mass Spectroscopy, and helped with testing a new program meant to intelligently select data
- Course list included: Organic Chemistry, Physical Chemistry, Differential Equations, Analytical Methods, Genetics, and Applied Spectroscopy.

Experience

Associate Manager / Lead Projectionist **May 2001 – January 2013**
Regal Cinemas **Austell, GA**

- Monitored projection equipment – repaired and maintained as needed
- Oversaw conversion of 3 projectors from analog to digital
- Supervised up to 3 management level members of my department along with support in supervising other employees within different roles. Responsibilities included scheduling work shifts, maintaining appropriate amounts of replacement parts, maintenance and troubleshooting of mechanical and electronic equipment as well as providing guidance and training
- Assist manager with estimating attendance levels, scheduling, and various logistical issues as appropriate.

Intern
Asahi Glass Company

June – December 2006
Yokohama, Japan

- Provided support to the Research and Development division
- Assisted in research aimed at developing novel polymers through synthetic and computational methods
- Also worked on a project started by a previous intern attempting to adapt lab scale experiments to larger industrial scale
- Specialties included polymer and surfactant chemistry
