Premier Strategic Solutions Group
2931 Dallas North Tollway, Suite 200
Frisco, TX 75034

Re: Field Chemist Position

Dear Sirs:

I would like to be considered for the **Field Chemist** position advertised by Premier Strategic Solutions Group. I am including my resume detailing my skills and experience with chemical process research and development, manufacturing support, customer support, and working with GMP guidelines. As part of this experience I have been responsible for the proper identification, packaging, labeling, and disposal of chemical hazardous waste. My experience with chemical waste management will prove valuable to you in filling this position. I am interested in a position that involves outdoor work.

In addition, over the course of my industrial career, I employed several techniques such as tracking mass balance, crude weight assay of mixtures, solubility curves, and determination of the chemical purity and potency of chemical intermediates. From this enhanced level of sophistication in data collection I was able to maximize the information gleaned from individual experiments to make informative conclusions. This level of data collection would be useful in any chemical environment, from bench scale work to pilot plant. My experience working under tight deadlines should also prove valuable to you in filling this position.

I am including my resume for your consideration. References are available on request. Please let me know if you have any questions or need more information. I can be reached by email or at (708) 374 9574. I look forward to speaking with you in the near future.

Sincerely,

Huzaifa Rangwala

Attached: Resume

Huzaifa Rangwala

Abstract

Chemist with chemical process development experience providing support for research and for manufacturing operations. Experienced in formulations, qualitative and quantitative analysis of organic compounds employing HPLC, GC, FTIR, NMR and MS. Familiar with writing and working with batch records and SOPs, QA compliance, writing technical reports and presenting results to a team.

Experience

2011- Alphora Research Mississauga, ON

Associate Chemist, Process Chemistry Research & Development

- ♦ Enhanced skills in the route development and subsequent scale up synthesis and purification of intermediates and final products in the syntheses of active pharmaceutical ingredients in the lab.
- ♦ Enhanced skills in the purification of stable organic compounds by chromatographic methods.
- ♦ Provided written and graphical summaries of methods, results and conclusions on a regular basis for reports and presentations.
- ♦ Performed searches for patent and for regulatory requirements as well as standard process development literature and patent searches.

2006 - 2011 Abbott Laboratories North Chicago, IL

Associate Chemist, Process Chemistry Research & Development

- ♦ Developed skills in the characterization of organic molecules using HPLC, NMR, GC-MS and LC-MS.
- ♦ Developed skills in the quantitative analysis of purity of products and assessment of purification methods by HPLC and NMR, including active pharmaceutical ingredients.
- ♦ Performed preformulation development of active pharmaceutical ingredients, including analysis of salt formation, crystal form, solvate composition, and stability analysis.
- ♦ Enhanced skills in the large scale scale up synthesis and purification of intermediates and final products in the syntheses of active pharmaceutical ingredients in the lab and pilot plant.
- ♦ Developed skills in the purification of stable organic compounds by modern automated chromatographic methods (normal and reversed-phase MPLC and HPLC) including setup,, maintenance and repair of component equipment.
- ♦ Completed regulatory documentation and reports for process scaleup. Maintained a detailed laboratory notebook, documenting progress of experiments and projects. Provided written and graphical summaries of methods, results and conclusions on a regular basis for reports and presentations.
- ♦ Performed database searching for regulatory requirements & training, and chemistry literature and patent searching as part of process development research.

2002-2005 University of Minnesota Minneapolis, MN

Research Assistant

- ♦ Developed skills in large scale multi-step preparation, purification and characterization of novel biologically active organic compounds and related novel analogs, employing modern synthetic, purification and characterization techniques.
- ♦ Developed skills in the purification of stable organic compounds by modern automated chromatographic methods (normal and reversed-phase MPLC and HPLC) including setup, maintenance and repair of component equipment.
- ♦ Research Summary available on request.

Education

2002-2005

University of Minnesota

Minneapolis, MN

Master of Science in Organic Chemistry

- ♦ Gained practical research experience in the design and optimization of the large scale multi-step synthesis, purification and characterization of a biologically active compound and structurally related analogs.

1997-2001

University of Toronto

Toronto, ON

Bachelor of Science in Chemistry

- ♦ Gained practical research experience in a fourth-year honours research project that led to a thesis, publication and a research conference presentation.

Selected Publications

- Allen, A. D.; Fenwick, M. H.; Jabri, A.; Rangwala, H.; Saidi, K.; and Tidwell, T. T. "Generation, Observation and Free Radical Reactivity of Aliphatic Bisketenes: The Solution to a Long-Standing Problem", *Organic Letters*, **2001**, 3 (25), 4095-4098.

Professional Skills

- ♦ Synthesis of organic compounds using modern air- and moisture-free techniques, including the safe handling, evaluation and disposal of hazardous reagents and intermediates in both small and large scale.
- ♦ Characterization of reaction intermediates and reaction monitoring of air-and moisture-sensitive reactions employing NMR techniques, HPLC and IR. Characterization of synthetic products and intermediates by 1D, 2D and heteronuclear correlation NMR spectroscopy (¹H, ¹³C, ³¹P and ¹⁹F), and normal phase and reverse-phase LC-MS techniques (EI, APCI, ESI mass spectrometry (high- and low- resolution).
- ♦ Quantitative and qualitative analysis of mixtures employing HPLC techniques, GC and IR. Experienced with method development and validation, isocratic and gradient liquid chromatographic techniques, including normal- and reversed-phase stationary phases. Routine use of automated HPLC and GC equipment, including setup, maintenance and repair of component equipment and method validation of chromatographic techniques.
- ♦ Characterization of analytes by GC-MS and LC-MS techniques (EI, APCI, ESI mass spectrometry (high- and low- resolution). Water content analysis using Karl Fischer titration.
- ♦ Purification of products by use of chromatography, crystallization and distillation, salt and emulsion formation, Routine use of distillation, sublimation and acid digestion. Familiar with scaleup procedures such as SOP and batch record writing for kilo-lab and pilot plant.
- ♦ Familiarity with use of computers for preparation of documents, spreadsheets, schemes and presentations, using ChemDraw, Microsoft Word, Excel, Powerpoint, and Access. Familiar with use of computers for data analysis, retrieval, and data management.

Additional Professional Activities

2002-2004-Teaching assistant for the General, Advanced and Honors Organic Chemistry laboratory courses for undergraduates at the University of Minnesota. Duties included setup, maintenance, and repair of analytical laboratory equipment. Assisted in the teaching, course development and evaluation of students.
