OBJECTIVE

To obtain a challenging position as a Field Chemist where I can apply my educational background and previous work experience.

EXPERIENCE

Clinical Researcher, The University of Pennsylvania August 2010 - January 2013

- Work alongside physicians and physicists to create treatment plans for cancer patients.
- Researched patients' clinical data to publish academic papers for both physics and medical oncology journals.
- Create programs to aide in data extraction from clinical data files and systems.

IV Pharmacy Assistant, Lancaster General Hospital August 2004 - July 2009

- Manage workflow from pharmacists to technicians.
- IV medication preparation (prepared in a sterile clean room where technicians are gowned and masked to prepare medications according to regulations).

Insurance Coordinator, Rite Aid Corporate August 2002 July 2004

- Resolve prescription insurance claims.
- Create and maintain an internal insurance database.

Pharmacy Technician, Rite Aid Pharmacy May 1999 - August 2002

- Input prescriptions into the system for dispensing.
- Preparing patient prescriptions.

EDUCATION

Temple University, Philadelphia, PA — B.S. in Chemistry, 2011

American Chemical Society

SKILLS

- Proficient in Word, Access, Excel.

- Basic data programming with Matlab.
- Patient Computed Tomography analysis in Eclipse Treatment Planning System.
- Create, research, and edit academic research papers.
- Analytically and mathematically inclined with a keen eye for details.
- Fluent in Vietnamese.
