SUMMARY

Blends academic background in environmental science and research, with technical experience as an analytical chemist to offer a proven track record of implementing environmental regulation, delivering on project deadlines, and thriving in a fast paced environment.

EXPERIENCE

Chemist I , Air Water & Soil Laboratories, Inc

Richmond, VA — 2013-Current

Performs over 35 different NELAC accredited analyses for determination of target analyte concentration in soils, drinking and wastewater. Coordinates and assigns work schedule for entire department based on holding and turn around times for samples. Independently analyzes over 200 samples per day, while upholding integrity and quality of final data. Compose data reports. Responsible for training new employees on current EPA and DOD methods. Fully trained in the operation and troubleshooting of various analytical instruments.

Wet Chemistry Department Intern, Air Water & Soil Laboratories, Inc

Richmond, Va — 2013

Developed technical and time management skills to work in a fast paced environment, under severe time restraints and deadlines. Maintained and calibrated various laboratory instruments and equipment. Gained knowledge of EPA and DOD methods implemented by Laboratory Standard Operating Procedures (SOPs). Safely handled, analyzed and disposed of hazardous environmental materials.

Environmental Intern, Virginia Sierra Club

Richmond, Va — 2011-2012

Raised environmental health awareness by writing letters to the editor of the Richmond Times Dispatch and various government leaders. Made over 1,000 phone calls to legislators to ensure votes for air quality, and suggested public health bills at the General Assembly. Created a local recycling campaign for Virginia Commonwealth University.

Grill Master, Buz and Neds Real Barbeque

Richmond, Va ---- January 2009-2014

Prepared and cooked quality food in a high stress environment, while following provided grilling techniques. Adherence to sanitary, safe work and food standards. Provided customers with satisfaction through timely and superior food service. Basic knowledge of calculations and POS system.

EDUCATION

Virginia Commonwealth University

Bachelors of Science, Biology — 2009-2013

Relevant Coursework: Ecology, Field Botany, Physics, Organic Chemistry, Water Pollution Biology, Invasive Species Biology, Calculus, Statistics

SKILLS

- Microsoft Office, Word, Excel, Powerpoint
- Element LIMS, Faspac II
- Astoria Pacific Flow Analyzer, UV-VIS Spectrometer, ISE Meter
