Summary

Previously worked for Clean Harbors as a Chemist and am looking to apply my engineering degree from a ranked institution towards a challenging position in EHS with a purpose and a future.

Highlights

- Responsible for compliance of hazardous waste program
- Used readily available references to provide straightforward solutions to day to day problems
- Knowledgeable in regards to OSHA, EPA and DOT standards
- Strong PC skills
- Collect and manage EH&S sustainability and key performance metrics
- Collected, evaluated data, and developed plans for assignments
- Lead and document risk assessments, incident investigations and other occupational safety programs
- Excellent written and verbal skills
- Regulatory interpretation, planning, auditing and systems evaluation

Accomplishments

Led site specific safety meetings and ensured a culture of positive safety values.

Identified possible job hazards and recommended atmospheric air testing which led to improved safety operating procedures.

Won "Most Innovative" award for Capstone Design Project at The Ohio State University.

Experience

Clean Harbors

January 2013 to April 2014

Chemist

Chicago, IL

Lab packed hazardous waste per Clean Harbors and DOT specifications. Maintained an EPA compliant 90 day hazardous waste storage facility. Participated in the emergency response team. Oversaw the collection of waste from the labs. Helped implement new laboratory safety protocol. Donned all levels of personal protective equipment per operating procedures. Interacted with top level researchers and scientist on a daily basis in regards to safety issues.

Central Florida Testing Laboratory

March 2012 to September 2012

Geophysical Field Technician

Clearwater, FL

Monitored daily progress of sinkhole repair projects. Maintained detailed records of contractors daily activities. Used ground penetrating radar.

Advance Testing Company

June 2011 to February 2012

Engineering Technician

Campbell Hall, NY

Performed ACI concrete field inspections and worked in a civil engineering quality assurance laboratory. Utilized Troxler nuclear density machines for soil compaction test.

Education

The Ohio State University

2009

Bachelor of Science: Chemical Engineering

Columbus, OH

Process Engineering, Heat and Mass Transfer, Thermodynamics, Analytical Chemistry, Organic Chemistry, Physical Chemistry, Differential Equations, Statistics, Linear Algebra, Unit operations and Design courses
