EDUCATION

Bachelor of Arts in Environmental Studies

Graduated Fall 2014

Richard Stockton College of New Jersey, Galloway, NJ 08026

GPA 3.25

GRE

Verbal 162

Quantitative 156

Associate of Arts in History

Graduated Spring 2010

Gloucester County College, Sewell, NJ 08080

RESEARCH EXPERIENCE

National Science Foundation Student Fellow, EAR-1004829,

Summer 2012

Research Experience For Undergraduates, NJSOC Field Station, Montclair University

- Sampled and identified aquatic vegetation communities at 12 sites on 3 rivers
- Calculated biomass using an oven and scientific scale
- Utilized ecological diversity equations to characterize vegetaiton communities
- Synthesized data with information from other participating fellows to gather results that were presented in a scientific journal styled paper and poster

Distinguished Student Fellowship, Awarded \$1000 Grant,

Spring 2012

Board of Trustees, Richard Stockton College of New Jersey

- Developed proposal, methodology, schedule, and budget for personal research focused on determing the drivers of macrofungi species richness
- Secured landowner permission and collected samples at two study plots
- Prepared herbarium and progress reports detailing cataloguing efforts

Stockton Vernal Pool Project, Advisor: Dr. Tracy Baker,

Spring 2012-Current

Special Project, Environmental Science Department, Richard Stockton College of New Jersey

- Monitored amphibian populations at vernal pools through species specific mating calls, passive observation, and catch / release methods.
- Cooperated with peers to document hydrologic and physical variables of vernal ponds using handheld a GPS unit and survey techniques

Phylogeny and population growth of *Amanita phalloides*

Spring 2012

Major Project, Environmental Science Department, Richard Stockton College of New Jersey

- Merged completed projects from Population Biology and Bioinformatics into a poster with a GIS map of potential habitat range and charts predicting population growth

Phenology of the Highbush Blueberry

Spring 2011

Major Project, Environmental Science Department, Richard Stockton College of New Jersey

- Coalated weather data with historical and present measurements of bud growth to determine if climate change was alteringighbush blueberry phenology

FIELDWORK METHODS

Ecological Sampling

Specimen Documentation

Animal Measurement

Keeping a Field Journal

Using a Dichotomous Key

Tree Identification

Fungi Identification

Reading Topographic Maps

Watershed Delineation

Hydrologic Equations

Precipitation Analysis

Operating a Flow Meter

Long Distance Hiking

Identifying Geologic

Formations and Minerals

SOFTWARE SKILLS

ArcGIS

Erdas Imagine

Vector NTI

Biological Databases

GenBank and BLAST

Protein and Gene

Modelling Applications

EstimateS

Google Earth

Microsoft Office

Apple iWork

Filemaker Pro

SAS Enterprise

HONORS AND AWARDS

Deans List (RSC 2012)

Presidents List (GCC 2011)

2nd Place in NAMS Poster

Competition (RSC 2012)

Distinguished Student
Fellowship (RSC 2012)
